

Subject Index to Medical Economics

January to June, 1956

Back copies of MEDICAL ECONOMICS, containing the articles and items in the following list, may be purchased, as long as the supply lasts, at the established back-copy price of 50 cents each. Individual listings show title, month of issue, and page number. Asterisk denotes full-length article of one page or more; other listings refer to items of lasting interest from departments devoted to news, letters, and editorial opinion.

"...may be unique as a wide-spectrum antimicrobial agent that is bactericidal, relatively nontoxic, and does not invoke resistant mutants."¹

Furadantin[®]

BRAND OF NITROFURANTOIN

*in acute and chronic
pyelonephritis, cystitis, prostatitis*

Percentage of Effectiveness of Furadantin Against Various Strains of Bacteria in Vitro

	Aerobacter aerogenes	Proteus sp.	Paracolo- bactrum sp.	Micro- coccus pyogenes	Strepto- coccus pyogenes	Esche- richia coli	Pseudo- monas aeruginosa
Furadantin	82.1	66.6	31.2	91.9	93.9	60.0	13.3
Antibiotic A	71.4	55.5	25.0	93.5	96.9	66.0	26.6
Dihydrostreptomycin	14.2	25.9	12.5	38.7	27.2	28.0	6.6
Antibiotic B	3.5	0	0	66.1	63.6	0	2.2
Penicillin	3.5	0	0	27.4	39.3	0	0
Antibiotic C	14.2	7.4	18.7	46.7	72.6	22.0	11.1

ADAPTED FROM HENRY²

Furadantin's "high degree of effectiveness against bacteria responsible for urinary tract infections is brought out by this study."²

Furadantin dosage—simple and safe: Average adult dose is 100 mg., q.i.d., (at mealtime, and on retiring, with food or milk). Average daily dosage for children is 5 to 7 mg./Kg. in four divided doses.

- Ⓢ SUPPLIED: Tablets, 50 and 100 mg., bottles of 25 and 100.
Oral Suspension, 5 mg. per cc., bottle of 118 cc.

an effective
muscle relaxant...

Tolseram

— SQUIBB MEPHENESIN CARBAMATE

Through selective blocking action on the internuncial system, Tolseram tends to interrupt the spasm-pain-spasm cycle, relieving the discomfort of skeletal muscle spasm and frequently permitting increased range of motion.

Dosage: 2 to 6 Tablets, or 1 to 3 teaspoons Suspension, three to five times daily, after meals or with a glass of milk or orange juice.

Supply: Tablets, 0.5 Gm., bottles of 100 and 1000. Suspension, 1.0 Gm. per teaspoon (5 ml.), bottles of 1 pint and 1 gallon.

Better
and more
efficient
service
to your
patients
with

The BURDICK ULTRASONIC THERAPY UNIT

The prolonged relief from tenderness and pain which ultrasonic therapy brings to such intractable conditions as bursitis, sciatic neuralgia, spondylitis and inflammatory myalgias makes treatment with ultrasound highly gratifying to both patient and physician.

Shorter treatments required with ultrasound save time for the physician and much fatigue and discomfort for patients. Such saving can mean "better and more efficient service"* for *all* your patients.

The Burdick Ultrasonic Therapy Unit is built to Burdick's usual high standards to give years of trouble-free service.

*Matlin, E.: Ultrasonics in General Practice, M. Times 83:788 (Aug.) 1955.

TO COUNTERACT

corticoid-induced adrenal atrophy during corticoid therapy, routine support of the adrenals with ACTH is recommended.

THIS IS THE PROTECTIVE DOSAGE RECOMMENDATION FOR COMBINED CORTICOID-ACTH THERAPY

- When using *prednisone* or *prednisolone*:
for every 100 mg. given, inject approximately 100 to 120 units of HP*ACTHAR Gel.
- When using *hydrocortisone*:
for every 200 to 300 mg. given, inject approximately 100 units of HP*ACTHAR Gel.
- When using *cortisone*:
for every 400 mg. given, inject approximately 100 units of HP*ACTHAR Gel.

Discontinue administration of corticoids on the day of the HP*ACTHAR Gel injection.

HP*ACTHAR[®] Gel
(IN GELATIN)

*Highly Purified

The Armour Laboratories brand of purified adrenocorticotrophic hormone—corticotropin (ACTH)

✓ UNSURPASSED IN SAFETY AND EFFICACY

More than 42,000,000 doses of ACTH have been given

This man is on a
sugar-free, low-calorie diet...

The pudding?

New **D-ZERTA**, of course!

There's nothing like a sweet dessert to pamper a patient on a diet! And new D-Zerta Pudding has all the sweetness and flavor of America's best-liked puddings.

D-Zerta Puddings (Vanilla, Chocolate or Butterscotch) are deliciously

sweetened with Sucaryl® and saccharin. There are as little as 54 calories in a serving!

D-Zerta Gelatin is sugar-free, too. Just 12 calories in a serving that costs only pennies. In six flavors at food stores everywhere.

Made by the makers of Jell-O Desserts . . . for those who must watch their sugar intake.

New sugar-free D-ZERTA Puddings and Gelatin

D-Zerta and Jell-O are registered trade-marks of General Foods Corporation. ©Sucaryl-Abbott.

In acute alcoholism, 'Thorazine' is now considered the therapy of choice. For example, 'Thorazine' offers these definite advantages:

- rapid control of excitation and delirium tremens.
- prompt control of nausea and vomiting.
- restoration of appetite and the ability to take liquids—
in many cases abolishing the need for intravenous fluids.

In chronic alcoholism, 'Thorazine' lessens or abolishes the anxiety and tension so often experienced by chronic alcoholics. It helps these patients to refrain from drinking and to be more receptive to psychotherapy.

THORAZINE* is available in ampuls, tablets and syrup (as the hydrochloride), and in suppositories (as the base).

July 16

BUTIBEL[®]

has many unique advantages as an antispasmodic-sedative...

Butibel contains (per tablet or 5 cc.):

Butisol[®] Sodium 10 mg. (1/6 gr.)

"daytime sedative" with less risk of accumulation or development of tolerance.

Ext. Belladonna 15 mg. (1/4 gr.)

Natural belladonna and Butisol have approximately equal durations of action (no overlapping sedation or inadequate spasmolysis).

In vaginitis

Stop the torment—destroy the cause

AVC

Improved

in trichomonal vaginitis —
*"... the most effective
 treatment available."¹*

in monilial vaginitis —
*"... more effective than
 any other agent ...
 used previously."²*

in mixed infection —
*"... the most effective
 treatment of endocervicitis. ..."³*

The rate of cure with AVC Improved is consistently high in all common types of vaginitis. In one series of patients with trichomonal vaginitis, bacteriologic cures were obtained in 82.5% of the cases.¹ Symptomatic relief is rapid and lasting. And because AVC Improved has an acid pH, it encourages the early return of normal vaginal flora.

Composition: A nonstaining cream containing 9-aminoacridine hydrochloride 0.2%; sulfanilamide 15.0%; allantoin 2.0%; with lactose in a water-miscible base buffered to pH 4.5.

Indications: Trichomonal leukorrhea; monilial and nonspecific vaginitis; cervicitis; postpartum hygiene; pre- and postcauterization, coagulation, conization, and other vaginal surgery; vaginal infections in children.

Administration: An applicatorful twice daily — on arising and at bedtime.

Supplied: 4 oz. tubes with or without applicator.

BREATHING and BALANCE

in bronchial asthma

Sterane

brand of prednisolone

whenever corticosteroids are indicated

Supplied: White, 5 mg. oral tablets, bottles of 20 and 100. Pink, 1 mg. oral tablets, bottles of 100. Both are deep-scored.

*Schwartz, E.: New York J. Med. 56:570, 1956.

provides restoration of breathing capacity—Relief of symptoms [bronchospasm, cough, wheezing, dyspnea] is maintained for long periods with relatively small doses.*

minimal effect on electrolyte balance—"in therapeutically effective doses . . . there is usually no sodium or fluid retention or potassium loss."* Lack of edema and undesirable weight gain permits more effective therapy particularly for those with cardiac complications.
